

Create credentials to access your database instance

Objective(s)

At the end of this lab you will be able to:

- Create your own instance of database on IBM Cloud using DB2 service

Exercise

Database credentials are required to connect from remote applications like Jupyter notebooks which are used in the labs and assignment in the last two weeks of the course.

0. Go to your IBM Cloud Resources dashboard (or click on IBM Cloud in the top left corner):

<https://cloud.ibm.com/resources>

Note: you may need to log into IBM Cloud in the process of loading the resources/dashboard.

If your connection is slow it may take over 30 seconds for the dashboard to fully load.

1. In the Resource list, expand the **Databases** heading and locate and click on your instance of Db2 you provisioned in exercise 2 (the name typically starts with Db2-xx for example Db2-fk, Db2-50, etc.)

The screenshot shows the IBM Cloud Resources dashboard. On the left is a sidebar with various service icons. The main area displays a list of resources categorized by service. The 'Databases' category is expanded, showing a single instance named 'Db2-pg'. This instance is highlighted with a red rectangular box. The instance details are as follows:

Name	Group	Location	Product	Status
Db2-pg	Default	London	Db2	Active

2. Click on Service Credentials in the left menu

Connections

3. Click on the button to create **New credential**

New credential +

In the prompt that comes up click the **Add** Button in the bottom right:

Create credential

Name:

Service credentials-3

Role: ⓘ

Cancel

Add

4. Check the box to **View credentials**

5. Copy and save the credentials making a note of the following:

- **port** is the database port
- **db** is the database name
- **host** is the hostname of the database instance
- **username** is the username you'll use to connect
- **password** is the password you'll use to connect

Service credentials

You can generate a new set of credentials for cases where you want to manually connect an app or external consumer to an IBM Cloud service. [Learn more](#)

Search credentials...

Key name	Date created
Service credentials-1	2021-0

```
{
  "connection": {
    "cli": {
      "arguments": [
        "-u",
        "mwh70849",
        "-p",
        "XXXXXXXXXXXXXXXXXXXX",
        "--ssl",
        "--sslCAFile",
        "1dd14d0c-1b52-4f63-a606-5",
        "--authenticationDatabase",
        "admin",
        "--host",
        "XXXXXXXXXXXXXXXXXXXX",
        "abases.appdomain.cloud:31198"
      ]
    }
  }
}
```

You need to scroll down to get the credentials details.
